WindEnergy Hamburg &
WindEnergy Asia-Pacific

Global energy transition.
Our events are where the industry meets.

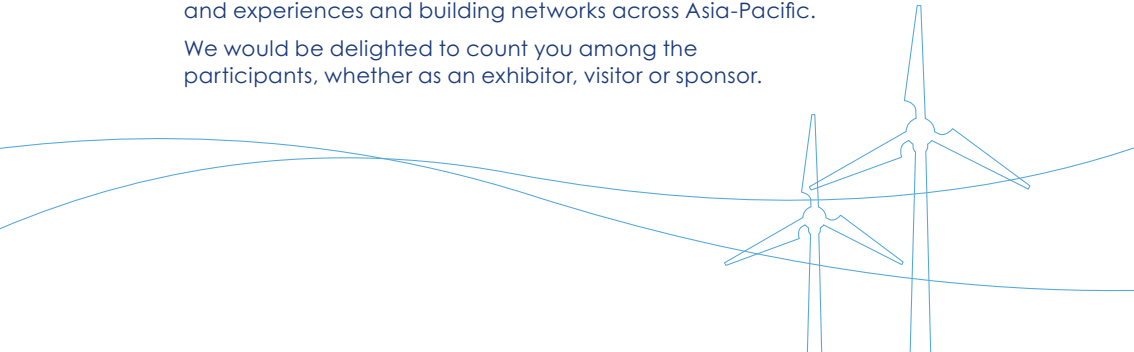

Hamburg Messe und Congress hosts a wide-ranging, steadily growing portfolio of energy-related events. Its growth is driven by the **global energy transition,** along with the **City of Hamburg's** strong business network spanning industries, logistics, science and renewable energy.

WindEnergy Hamburg is the global meeting place for the wind energy sector – both onshore and offshore. This globally unique event, comprising an exhibition and a conference, brings together experts and decision-makers from across the wind industry's value chain to network and develop projects together.

As a part of WindEnergy Hamburg, the **Energy Storage Area,** showcases key technologies essential to the success of the energy transition in a dedicated section.

With **WindEnergy Asia-Pacific 2027 powered by RECHARGE**, we are taking the next step towards expanding our presence in one of the world's most dynamic growth markets. It will establish Singapore, a major business metropolis in this region, as an additional international meeting place for the industry, providing numerous opportunities for sharing knowledge and experiences and building networks across Asia-Pacific.

We would be delighted to count you among the participants, whether as an exhibitor, visitor or sponsor.

PANEL DISCUSSION:
WITH SO MUCH UNCERTAINTY SURROUNDING THE INDUSTRY, WHERE WILL THE NECESSARY INVESTMENT COME FROM?

WindEnergy Asia-Pacific
The on & offshore event in Singapore
25————27 May 2027
Powered by RECHARGE

WindEnergy Asia-Pacific
opens the door to new markets.

Asia-Pacific holds great potential for the **international wind energy industry.** Driven by dynamic growth, ambitious development goals and increasing energy demand, the region is one of the most attractive growth markets.

The opportunities in this market will be highlighted at **WindEnergy Asia-Pacific 2027 powered by RECHARGE** in Singapore. After the successful premiere of the RECHARGE Wind Power Summit 2026 Asia-Pacific, the international wind energy industry will meet again at the **Marina Bay Sands Expo and Convention Centre, Singapore in May 2027.**

Experience a focused expo for onshore and offshore wind, combined with a first-rate conference programme. Exchange ideas and views with industry leaders, gain insights into market trends and the political conditions, and forge business links with key decision-makers from politics, business and finance.

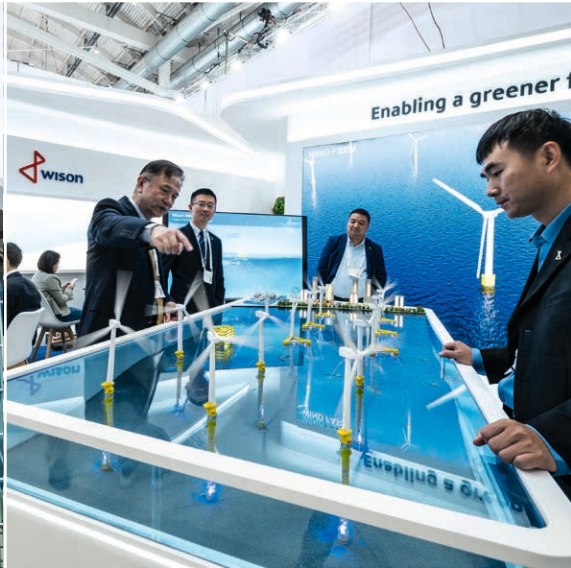

Join us in Singapore, and let us unlock the region's business potential together.

WindEnergy Hamburg
The global on & offshore event

26 — 29
September 2028

WindEnergy Hamburg points the way.
The next step of the energy transition

At the world's leading wind industry trade fair, the top players from industry, science, politics and finance will join forces to make wind energy the number one energy source of the future. **WindEnergy Hamburg** will present an impressive array of exhibits covering all segments of onshore and offshore wind, accompanied by a comprehensive conference programme.

WindEnergy Hamburg is the meeting place of the international wind energy industry. Discover market-changing innovations, engage in conversations with key decision-makers, and find the right partners for your projects.

Come to Hamburg, and let us drive the energy transition together.

Energy Storage Area
Solutions for the energy transition

Energy storage is key to a successful energy transition, andconsequently an essential building block for a zero-carbonenergy future. Innovations and trends in this sector are the focus of the 'Energy Storage' section, which will once again have its own exhibition hall at **WindEnergy Hamburg.**

In the Energy Storage Area, manufacturers, suppliers and system providers will showcase trailblazing energy storage-technologies and system integration solutions. **The international industry audience at WindEnergy Hamburg offers you enormous potential** for sharing experiences and building-business links.

Join the Energy Storage Area 2028 and engage in targeted discussions with experts, decision-makers and potential project partners.
